Volunteering with the CIEH or..... putting something back

The many facets of CIEH volunteering

Quote from Anne Godfrey...

Chartered
Institute of
Environmental
Health

“Without colleagues like you the CIEH would be much less effective and less influential. By becoming a volunteer, you can help us make the CIEH even better, gain personal satisfaction, learn more about your professional body, and maybe even learn some new skills along the way, as well as proving a valuable service as part of our membership offer”

Anne Godfrey, 2016

The volunteer experience... quotes from our volunteers...

"Things have definitely improved for the better in terms of what CIEH are now doing for volunteers than when I first started volunteering. The recent changes to enable a less formal structure at branch level also help people stay involved"

"I don't think I would have done it for so long if I didn't derive some satisfaction from it"

Peter Mather

– my volunteer experiences

- The membership network – C&I SIG board member, then Chair
- National conference contributor
- Student training (PPP) provider
- CIEH Excellence Awards....

David Newsum

– my volunteer experiences

- The membership network – branches, Regions, SIGs, working groups
