

# HHSRS: damp, mould, and excess cold

This course has been revised to provide direct reflection on the implications of the Awaab Ishak case and the need for thorough and detailed inspection and understanding of the causes of damp and mould and excess cold, assessment of these hazards and their health effects using HHSRS, and remediations that may be applicable.

The course is suitable for both private sector housing enforcement officers and environmental health officers, and those working in the social or private rental sector involved in inspections of dwellings.

## Programme day one

- 9.15 Introduction and Course Aims
- 9.30 The Awaab Ishak case – summary and implications
- 10.00 Damp and Mould – the extent of the problem and health effects
- 10.30 Causes of damp and mould
